Enforcing Mandatory Fields Using UI Policies and Migrating Changes with Update Sets

PROBLEM STATEMENT:

In many organizations, incidents are moved to the **In Progress** state without defining the **Priority** field. This leads to poor data quality, improper incident classification, and inaccurate SLA tracking.

There is a need to enforce important fields dynamically without modifying the default ServiceNow functionality.

OBJECTIVE:

- To ensure the Priority field is filled when the incident moves to **In Progress**
- To improve data quality in the Incident form
- To use UI Policy to make fields mandatory
- To guide users using UI Action
- To avoid changing default ServiceNow features
- To store all changes using Update Sets
- To migrate configurations from one instance to another
- To follow proper ServiceNow development practices

SKILLS USED:

- UI Policy
- UI Policy Action
- UI Action
- Incident Management
- Update Sets
- ServiceNow Administration
- Configuration Migration

TASK INITIATION

MILESTONE 1: CREATE UI POLICY

◆ ACTIVITY 1: Creating UI Policy

Steps:

1. Login to ServiceNow

2. Navigate → Incident
3. Go to UI Policies
4. Click New

Fill:

- Table → Incident
- Short Description → Mandatory Priority when In Progress
- Condition → State is In Progress
- Active → True

The screenshot shows the ServiceNow interface for configuring a UI Policy. The title bar indicates 'UI Policy - Mandatory Priority when ...'. The main form includes the following fields and sections:

- Table:** A dropdown menu set to 'Incident [Incident]'.
- Application:** A dropdown menu set to 'Global'.
- Active:** A checkbox that is checked.
- * Short description:** A text field containing 'Mandatory Priority when In Progress'.
- When to Apply:** A section with a 'Conditions' label and two buttons: 'Add Filter Condition' and 'Add "OR" Clause'. Below these, there is a condition builder showing 'State' in a dropdown, followed by 'is' in a dropdown, and 'In Progress' in a dropdown. To the right of the condition are buttons for 'AND', 'OR', and a red 'X' button.
- Update/Delete:** Two buttons located below the condition builder.
- Related Links:** A section with two links: 'Advanced view' and 'Run Point Scan'.
- UI Policy Actions (2):** A section with two tabs: 'UI Policy Actions (2)' and 'UI Policy Related List Actions'.

5. Submit

◆ ACTIVITY 2: UI POLICY ACTION

Steps:

1. Open UI Policy
2. Scroll → UI Policy Actions
3. Click New

Fill:

- Field → Priority
- Mandatory → True
- Visible → True
- Read Only → False

MILESTONE 2: CREATE UI ACTION

◆ ACTIVITY 1: Creating UI Action

Steps:

1. Navigate → UI Actions
2. Click New

Fill:

- Name → Move to In Progress
 - Table → Incident
 - Action Name → move_in_progress
 - Form Button → Enabled
 - Active → True
3. Submit

MILESTONE 3: UPDATE SET CREATION

◆ ACTIVITY 1: Create Update Set

Steps:

1. Navigate to Update Sets
2. Click New

Fill:

- Name → Mandatory Field Enforcement Project
- Set as Current

1 to 3 of 3

MILESTONE 4: MIGRATION PROCESS

◆ ACTIVITY 1: Export Update Set

Steps:

- Open Update Set
- Click Export to XML
- Download file

The screenshot shows the ServiceNow interface for an Update Set. The title bar reads "Update Set - UI Policy for Mandatory Priority 2". The form includes fields for "Parent", "Release date", "Install date" (2026-03-27 23:16:31), "Installed from", and "Description" (UI Policy for Mandatory Priority). There are "Update" and "Back Out" buttons. Below the form, there are "Related Links" including "Export to XML", "Merge With Another Update Set", "Scan Update Set", and "Show Update's History". At the bottom, there are tabs for "Customer Updates (3)", "Update Set Logs (5)", and "Child Update Sets".

◆ ACTIVITY 2: Import Update Set

Steps:

1. Go to Retrieved Update Sets

The screenshot shows the ServiceNow interface for the "Retrieved Update Sets" table. The table has columns: Name, Application, State, Update source, Description, Loaded, Committed, Parent, and Remote Batch Base. There are two rows of data.

Name	Application	State	Update source	Description	Loaded	Committed	Parent	Remote Batch Base
UI Policy for Mandatory Priority	Global	Committed	(empty)	Making the Priority field mandatory when...	2026-03-25 00:28:51	2026-03-25 00:31:17	(empty)	(empty)
UI Policy for Mandatory Priority 2	Global	Committed	(empty)	UI Policy for Mandatory Priority	2026-03-27 23:14:46	2026-03-27 23:16:30	(empty)	(empty)

Below the table, there are "Related Links" including "Import Update Set from XML". At the bottom, there is a pagination bar showing "1 to 2 of 2".

2. Click Import from XML
3. Upload file

3. Try saving without Priority

Expected Result:

System should not allow save

Actual Result:

Priority becomes mandatory

The screenshot shows the ServiceNow interface for incident INC0010002. The 'Priority' field is set to '1 - Critical'. The 'Task SLAs' section is expanded, showing a table with one row: 'Priority 1 resolution (1 hour)' with a progress bar at 15.42%.

SLA definition	Type	Target	Stage	Business time left	Business elapsed time	Business elapsed percentage	Start time	Stop time
Priority 1 resolution (1 hour)	SLA	Resolution	In progress	50 Minutes	9 Minutes	15.42%	2026-03-27 23:20:47	(empty)

RESULT

- Priority field enforced successfully
- Improved data quality
- SLA tracking improved
- No OOTB modification done
- Migration successful

CONCLUSION

This project successfully enhances incident data integrity using **UI Policies** without modifying core ServiceNow functionality. The UI Action ensures proper workflow guidance, while Update Sets enable controlled migration between environments.

This demonstrates best practices in:

- Configuration management
- Data validation
- ServiceNow development
